

# Clear Horizon

## CURRICULUM VITAE

### Ethel Karskens, Data and Insights Lead

#### Overview of Expertise

Ethel has extensive experience with data and product strategy, analytics, and reporting. She has worked on complex data projects and innovative digital products, combining technical expertise (product analytics, ETL, advanced analytics, data visualisation, etc.) and strategic thinking. She worked with large organisations as well as fast-paced start-ups, delivering and implementing data-driven solutions for the organisations and with the organisations. She also gives data analytics training of SQL and Tableau.

#### Qualifications & Training

- 2014 Master of Sciences in Applied Economics, Solvay Brussels School of Economics (Brussels, Belgium)
- 2012 Bachelor of Sciences in Applied Economics, Solvay Brussels School of Economics (Brussels, Belgium)
- 2021 Outcomes Based Funding, UTS Open
- 2020 Humanitarian response to conflict and disaster, Harvardx
- 2019 Designing and running randomizing evaluations, MITx
- 2018 Data Science, General Assembly (Sydney, Australia)

#### Project Experience

##### Data Strategy and Roadmap

- Designed the data roadmap for multiple data projects and start-ups to allow clear phases of implementation in accordance with the organisations' strategy and resources.

##### Advanced Data Analytics

- Developed advanced SQL queries for complex data projects and data science modelling to detect financial frauds or learn from user's behaviours on digital platforms.
- Developed advanced Python script for extracting, wrangling, analysing and visualising data.
- Leveraged Python to develop Natural Language Processing and Network Analysis scripts.

## Dashboard Reporting

- Created dashboards in Power BI, Tableau and Google Studio to inform stakeholders and deliver insights to the organisations.

## Data Training

- Trained data and non-data professionals to build the data capabilities of organisations, especially in data analytics, product analytics and data visualisation.

## Product management

- Develop and prioritise the product roadmap of digital products based on business requirements and resources, including data-driven approaches to assess the prioritisation of the features.
